

What makes a HEALING HOME?

The first thing patients ask when they're admitted into a hospital is "When can I go home?". When patients perceive a hospital visit to be patient centered, they experience better recovery and emotional health. Patient-centered care enables faster healing, happier patients and higher HCAHPS scores. Home-like touches in hospitals help patients feel more comfortable and confident in their care. Kimberly-Clark Professional* partners with you to create this type of environment, adding in small touches of home that help your patients get back to the things they love.

Familiar brands bring comfort

6 OUT OF 10

6 out of 10 patients stated having familiar brands like Kleenex® and Scott® in the patient room provides more comfort and care for them and their family.

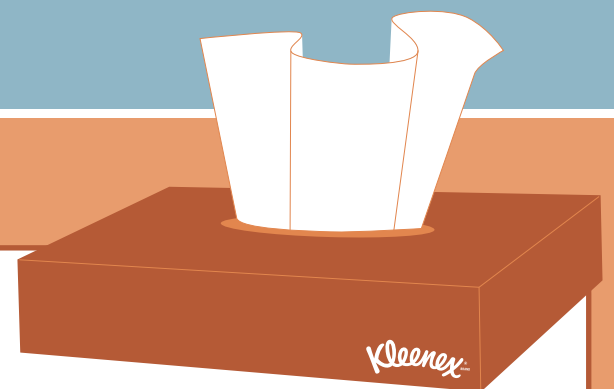

Little things make a big difference

70%

In a recent study, almost 70% of respondents stated that the **little things mean so much** during a hospital stay, like having brands they are familiar with.

Feels like home

64% of patients said the new **Kleenex® Tissue box design** would improve their impression of their room and they would rate it higher on the patient survey.

64%

Scott®

According to the **Center for Disease Control and Prevention**, clean hands are one of the most important factors in preventing the spread of dangerous germs and antibiotic resistance in healthcare settings.

Drying your hands with a paper towel, **such as Scott® Hand Towels**, can reduce bacteria on hands by up to 77%.
